

## **ABSTRACT**

Here are quite a number of young people dropping out of school in kecamatan Gunung Putri District and very unsettling for families. The majority of the school dropouts are not yet employed and some work as day laborers. The problem is for those who have not yet been able to disturb the peace of the family and the environment because it is still a burden on the family. They find it difficult to find work because the average education is the highest of the First Middle School graduates and do not yet have certain skills. Therefore, this young school dropout is our special concern together. They need to be given the provision of entrepreneurship, so they can be independent by opening their own businesses. The school dropout youth needs to be given motivation and basic entrepreneurship training, so they have the skills to try. The results of the dedication attended by 47 participants were welcomed with great enthusiasm by the participants. In the discussion, after the presentation of the material showed the participants' enormous interest in the material presented, even from the results of the distributed questionnaire showed the participants were very satisfied with the presentation of this material. The suggestion received was that participants felt they were not sufficient with the time provided and it was hoped that the training program would be continued in the future
