

Abstract

The counseling of making floor cleaner for household use is done by the service team to help housewives in dealing with household income constraints and in an effort to reduce the effects of rising inflation on household consumption goods.

This community service team is carried out in the form of counseling to make floor cleaners for household use and can also be used for home industry. So that this activity is expected to be able to help the difficulties of the economic crush due to rising prices of household consumption goods.

This service is expected to help households to be able to produce home industry products so that it has the potential to be developed on a larger industry scale.
